## Collie Text To HTML With Registration Code Free

Output to a file only if you prefer to preview HTML files, you must download the file when you are finished with Collie Text to HTML. Please enter the name for your file in the name field. For example, if you paste in "Hello, World!" then open the program again, the file is named "Hello, World!.html". If you hit the OK button, the file will be written out to the same directory. Collie Text to HTML can edit or write to the clipboard. Simply copy some text from the browser, and paste the text into Collie Text to HTML using the Paste to HTML function. The program can automatically remove line breaks ( ), white spaces (\r \r ) and tabs (\t) from the text you paste into the main window. Collie Text to HTML is a FREE program! It requires Windows operating system. User Comments Collie Text to HTML (pronounced as Collie Text To HTML) is a very handy software for converting text into HTML format. This program allows you to easily convert text into HTML or HTML file. You can also create a new HTML file from the current source using this software. Besides that, it has many other features such as clipboard, create or modify shortcuts and paste documents. It supports many document formats including text (TXT, TXT2), image (BMP, JPG, PNG, EMF), sound (WAV, MID, SND), metafile (ICO) and binary (DIB, DDS). Handily Collie Text to HTML is a very easy to use software because it comes with a user friendly interface. It converts your text into HTML file (It also works for image and sound files) by just pasting the text content into the input box and pressing the Convert button. Collie Text to HTML also allows you to use the default option. For example, if you copy your favorite website URL into the input text box then the URL will be added automatically. With the help of the shortcut feature, you can create hot keys for easy access. If you are a traveler, you can create a collection of shortcut for web page and other files. The program also offers the option of creating a printable document from the existing text file by adding the HTML tags. Collie Text to HTML displays the converted content in the main window which shows the source text, output and current file name. The output is displayed
