Advert 11 July 2017 Pics: EA Sports Q: InnerHTML of an object is undefined in IE 11 I am trying to fill the inner HTML of a div in IE11 using jQuery. I do have a AJAX call which returns the HTML as a string. The HTML is properly passed through and shown in the console. But when I try to put it into the innerHTML of the div, it is undefined. I don't know what I am missing. The string is returned correctly from the server I believe it has something to do with the response format, as I tried an alternative method of passing the HTML content and it worked fine in IE11. I am not sure if it is an IE11 browser issue. Please help. HTML Javascript \$.ajax({ type: 'POST', url: 'ajax/populate-template.php', success: function (template) { console.log(template); \$('#app').html(template); }, error: function (XMLHttpRequest, textStatus, errorThrown) { console.log(errorThrown); } }); A: In your AJAX response, your server returns the HTML as the text, which is a buffer (in text/plain format). You need to have the returned data be HTML (text/html format) or JSON, as the text version of HTML (text/plain) will be read as text, and thus the innerHTML value will not get set
