To capture the real-world data, the players, the ball and their surroundings are tracked at 5,000 frames per second, enabling for a new level of player movement and control. Players' movements will also be modeled in greater detail with more precise collision, running, acceleration and deceleration and improved ball physics. Set to be released on PS4, Xbox One and PC, FIFA 22 will be available in February 2018.

Q: Как получить все поля из таблицы При обновлении таблицы подставляются новые значения необходимым полям. Так как до строки с новым значением может быть предварительно несколько строк, нужно получить несколько полей из таблицы через одну строку, а не через сколько-то отдельных строк.

A: `$q = $this->db->get('table');`
`$q->result_array();` Ещё видно как заполняются массивы: `foreach($q as $i=>$r){ echo $r->some_field; echo $r->some_other_field`

Features Key:

- Manage your destiny as you side for club like never before. Build your team, customize their kits, and you can add fans to inject new life into your club.
- Find a new kind of soccer. Technological enhancements and new tweaks have been introduced to the game, allowing for a dramatic increase in artificial intelligence and player awareness in ball physics, creating a uniquely responsive and virtual experience.
- Step back and take your breath. Analyzing hours of real-life player movement data, FIFA 22 has tech that creates a more authentic experience. Powered by the updated "Precision Matchball" ball physics, players will move smoothly across the pitch like they do in real life.
- Combine the old and the new.
